## SOFTEN, BOX PANEL

Custom-made box panels consist of a single continuous panel of felt, which is beveled on the back side at the folds. The end result is a panel in the form of a box.

The size of the panel can be freely determined within the maximum size of the felt board. This makes it possible, for example, to create surfaces made up of panels of different sizes and depths. Beveled corners are also possible!

The panels can be made in the standard felt colours, or the surface can be made using some of the felt-like fabrics from the ready-made collections, e.g. Soul, Luna2 and Hush / Gabriel A/S), or Blazer, Blazer Lite and Synergy / Camira Fabrics. Patterns can also be grooved into the surface of the panel.

- material 100% PES (made from recycled PET bottles)
- felt panel max. size 1250 × 3000 mm
- felt panel strength 8 mm
- standard colours light grey, dark grey, white or black
- can be upholstered with felt-like fabrics
- when the edge depth is 40 mm and the filling is 25 mm acoustic infill, the abs. class is A / EN ISO 11654

- lower and deeper panels are possible (depth affects damping classification)
- indoor climate classification M1 (felt surface & infill)
- fire classification of the felt surface B-s1,d0 / EN 13501-1
- velcro or screws for installation.
- delivery in approx. 4 weeks
