SOFTEN

Mood offers the full range of Soften, from Classic panels to customised made-to-measure solutions. The products work both as stylish interior design elements and as sound dampeners.

The collection of finished products includes wall panels, wall screens and lighting fittings.

The main material is a felt sheet made from recycled PET bottles, which can be pressed into shaped panels, or cut, patterned or layered to create customised designs.

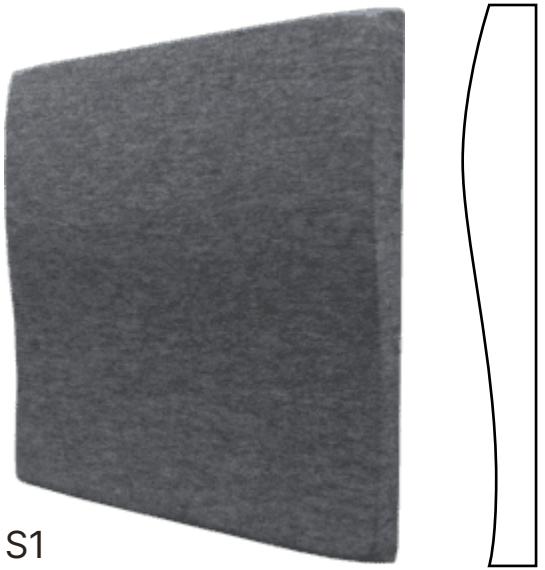

The felt sheet is available in four standard colours. Some products can also be upholstered in felted fabrics, e.g. Soul, Luna2 and Hush / Gabriel A/S), or Blazer, Blazer Lite and Synergy / Camira Fabrics. Patterns can also be grooved on the surface of the panel.

Soften's products have indoor climate and fire classifications that meet the requirements of public space furnishing, as well as the Allergy and Asthma Label issued by the Allergy and Asthma Association.

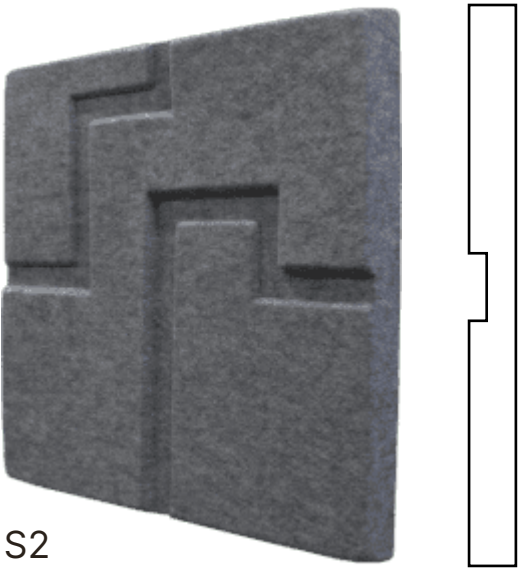

CLASSIC COLLECTION
