

zilenzio

Catalogue 2024

Zilenzio develops and delivers high-quality sound absorption using well-considered and designed solutions. Our products are the result of our long experience in sound design, analysis of offices, and tests carried out according to international standards.

We have created healthy acoustic surroundings in many workplaces, and our employees have high expertise in sound absorption and the acoustic properties of different materials.

We are experts in improving the sound environment.

Zilenzio Pro

Zilenzio Pro is part of THE GREEN TAG manifesto, our commitment to creating high quality products with a longer lifespan. All products in the series use Stone Wool for exceptional sound absorption, a recyclable and ultra durable material that is also fire and water-resistant. Several are available with replaceable fabric to extend the product's life and offer a truly sustainable alternative. Zilenzio Pro meets the market requirements with a complete and updated reference and labeling system. The system is based on three requirement areas. Quality (technical requirements), environment and responsible supply chains regarding socially, environmentally, and ethical responsibility.

Zermatt

Desk Absorber

A desktop screen designed by Studio Stockholm that separates without feeling static. The welcoming design creates a unique feeling of spaciousness while at the same time giving better focus. When multiple desktop screens are placed against each other, the result is a dynamic and undulating landscape. Zermatt is available as a one-piece front and side screen or as a single front screen, and can be adapted to desks from 1200–1800 mm (48–72").

Tune

Seating Absorber

Tune is a sound absorbing sofa collection designed by Norm Architects for Zilenzio. Tune sofas are now complemented by an armchair and a pouf. The armchair can be used advantageously as a pod for increased privacy. Tune is also part of the Zilenzio Pro family that uses stone wool for best sound absorption. Tune sofas and armchairs have an upholstered, sound-absorbing back that can be combined with comfortable pillows.

Available with: Pouf
Available with: Coffee Table
Available with: Laptop Table

Tune

Seating Absorber

Tune is a sound absorbing seating collection designed by Norm Architects. The Sofa has a clad sound absorbing shell that’s combined with soft cushions that follows the smooth and clean lines of the sofa.

Available with: Pouf
Available with: Coffee Table
Available with: Laptop Table

Kyoto is a modular sound absorbing partition system, enabling buildable environments for calm and focus. The updated design lets workplaces seamlessly adjust layouts for a flexible, efficient and healthy use of space. Available in six different widths and three heights, with two floor drop heights. New adaptable accessories include feet for creating freestanding breakout spaces and wheels for easy moving. Add a whiteboard (available in three sizes) or hooks for hanging. Frames are in ash.

Available with: Stand alone feet
Available with: Wheels
Available with: Whiteboard
Available with: Hanger

Dezibel Ceiling

Ceiling Absorber

Dezibel Ceiling is available in several sizes and shapes, and can be combined endlessly to create the visual and acoustic effect you need. They are an efficient way to reduce echoes and reverberation in public spaces. Moreover, they are a good complement to other sound absorption screens and solutions.

Dezibel Wall

Wall Absorber

Dezibel Wall are panels that are available in several sizes and shapes, and can be combined endlessly to create the visual and acoustic effect you need. The panels also work well as message boards. They are an efficient way to reduce echoes and reverberation in public spaces. Moreover, they are a good complement to other sound absorption screens and solutions.

Dezibel Print

Wall Absorber

An easy way to give your absorber a unique character is to print something on the fabric. Perhaps a company logo or pattern? The canvas is yours, and the possibilities endless.

Dezibel Divider

Ceiling Absorber

Dezibel Divider is a sound-absorbing module available in optional sizes that can be combined in many different ways. The absorbers are either suspended at 50 mm (2") intervals. Get a ready-made combination or design your own adapted after the customers specific space.

Dezibel Flexible

Desk Absorber

Dezibel Flexible is developed with a focus on sound absorption, flexibility and the ability to create more uses for large tables. It serves primarily as a barrier to place at strategic locations to divide and screen off sound. For a more sustainable option, choose removable fabric without any extra charge.

Available with: Straight and rounded corners
Available with: Removable fabric

Dezibel Table

Desk Absorber

Dezibel table has been developed to provide the best possible design with optimal dimensions for noise reduction between workplaces. The table screen provides an effective and creating working environment by lowering noise levels and improve the personal feeling. For a more sustainable option, choose removable fabric without any extra charge.

Available with: Straight and rounded corners
Available with: Removable fabric

Dezibel Table Duo

Desk Absorber

Dezibel Duo has been developed to provide the best possible design with optimal dimensions for noise reduction between workplaces. The table screen provides an effective and creating working environment by lowering noise levels and improve the personal feeling. The screens can be adapted to the specific fittings you use for your desk.

Available with: Straight and rounded corners
Available with: Removable fabric

Dezibel Floor

Floor Absorber

Dezibel Floor screen has a minimal design combined with maximum noise reduction. It is developed to correct acoustics problems between workplaces. Its interior consists of stone wool which creates a comfortable sound environment. The floor screen is available in a broad range of fabrics, allowing you to personalize textures and colours. For a more sustainable option, choose removable fabric without any extra charge.

Available with: Removable fabric
 Feet options: Beam, Base, Base+Beam, Cube

Delta Leaves

Wall Absorber

Leaves is a modular collection of acoustic wall panels. They come in three sizes in order to fit all spaces, from a compact meeting room to a vast open space. They can be used alone or together, horizontally or vertically, and can be combined in an infinite variety of compositions, adding a bit of playfulness in the workplace. The collection also invites to play with colors and textures, by creating soft camaieus for instance. Two models of shelves complete the collection, adding additional function.

Delta Ceiling

Ceiling Absorber

Delta is a sound-absorbing system floating in the air, like a soft and generous flight of kites. Soft petals or pebbles polished by the waves, Delta protects the user from noise while delimiting a space of quietude. It comes in various shapes and finishing, which allow it to be used in very different places, from restaurants to hotel lobbies and libraries. Delta is available in three sizes and a variety of fabrics.

Delta Wall

Wall Absorber

Expanding on the aesthetics of the Delta series, Delta Wall balances its soft curves with reliable acoustic dampening. Its segments are available in different sizes and can be colour matched harmoniously to suit all applications and spaces.

Tone

Storage Absorber

Tone cabinets are sound dampening design pieces made to help build a balanced acoustic environment in the workplace or at home, ultimately making it easier to focus and concentrate.

Available with lock

Plant Absorber On Casters

Zorla is a multifunctional space divider with sound absorbing effects, perfect for reducing noise in open room constellations. The top wooden box in ash can be filled with artificial or real plants to make it a decorative piece of furniture, making it especially useful in schools and offices. That means that Zorla Planter has solutions for both artificial and natural plants, and also shelves on one side and stone wool on the other side, or stone wool on both sides.

Mezzo

Floor Absorber On Casters

The wheeled floor screen Mezzo is a versatile mobile project screen and message board in one; sound absorbing, a white board on the glass side, and a message board on the fabric-covered part — all combined into one product.

Skog

Floor Absorber

Skog floor screen has high quality with respect to both design and noise reduction. It can be used not only as decoration in the interior design of public environments but also as a screen in office surroundings. The decorative shaped acoustic floor screen will add a modern twist to any environment with its shape, vibrant colours, and unique design. It makes the environment look and feel like a calm, peaceful forest, Skog in Swedish.

Timber

Wall Absorber

Timber is a minimalist sound-absorbing module that can be combined in many different ways. They work well as classic wall panels, but also as herringbone, graphic wall pieces, or spaced to create a more airy look.

Cloudz

Ceiling Absorber

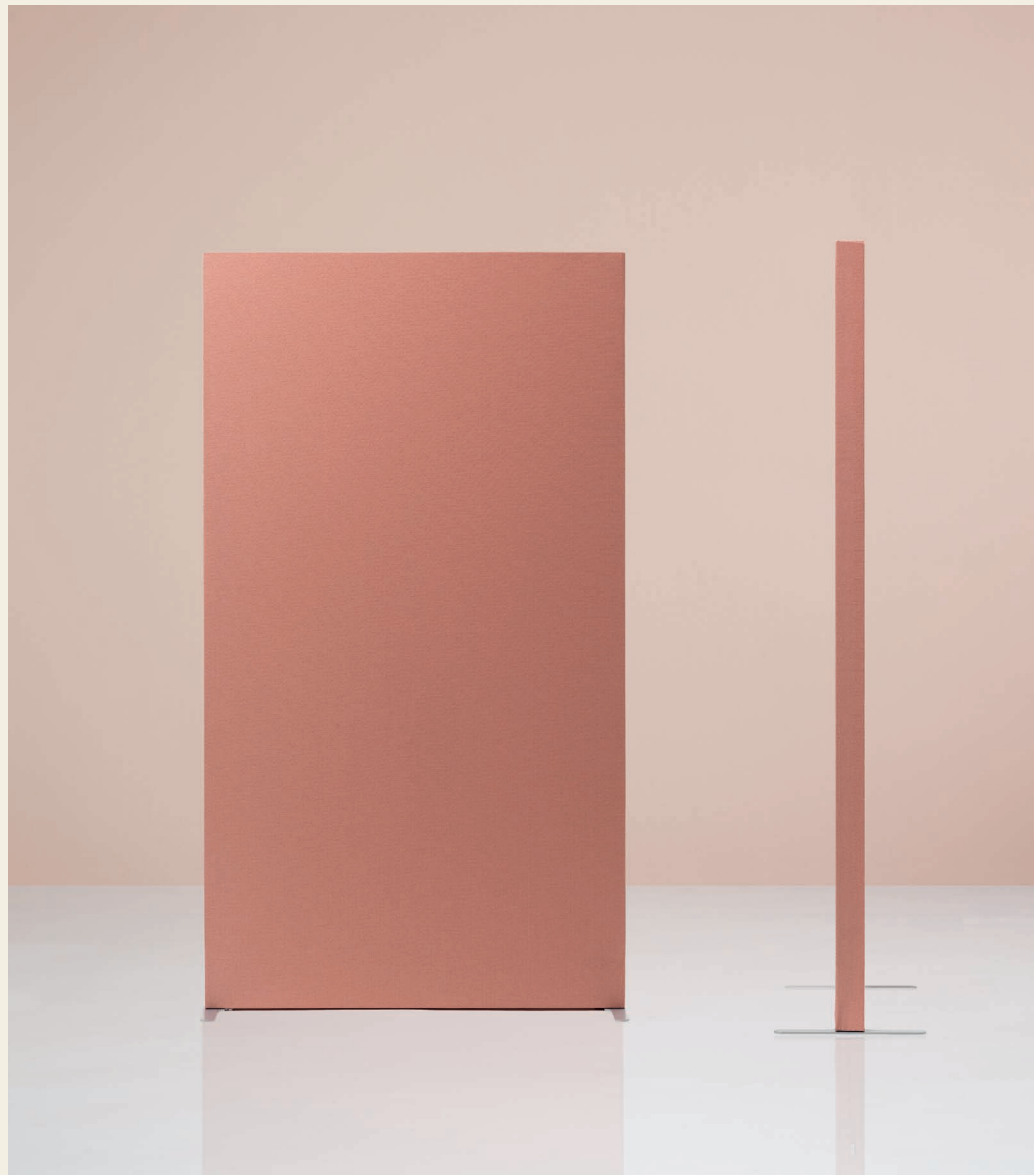

The Cloudz ceiling-mounted absorbers are designed to be suspended in layers one above the other, and have thus been provided with holes through which cables can be drawn in order to attach one layer to another layer below. Five variants are available to create a diverse and light-hearted impression. A ceiling-mounted absorber is often a useful supplement to other types of absorber measures.

Classic

Floor Absorber

The Classic floor screen, is a very popular member of our PRO family and has a minimal design combined with maximum noise reduction. Classic can be used by itself or be connected with other pieces to shield off differently sized environments.

Fazett

Wall Absorber

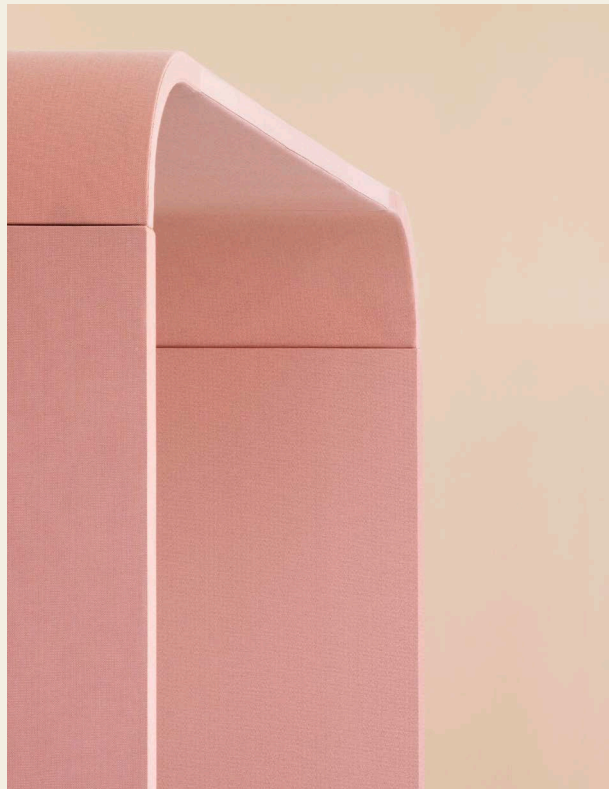

The Fazett wall system offers sound absorbing tiles in three different shapes and sizes, and a variety of colors. The individual building blocks can be combined in multiple ways to cover all kinds and scales of surface. They create a decorative wall pattern that absorbs sound at the same time.

Arc

Sound Absorbing Space Divider

Arc is a sound absorbing archway that provides a pleasant feeling of enclosure inside a larger space. Verticals and ceiling come together to create a room within a room. Arc can be used as freestanding unit, or placed against a wall, to easily define a new space and create a quiet atmosphere.

Dotz

Floor Absorber

Stone wool filling and external cover of textile or laminate. An MDF dividing strip is always located at a height of 700 mm (27,6") from the floor. It is possible to select filling for top and bottom. Can be supplied with toughened glass in the top section, with or without frame.

Offizz

Floor Absorber

The Offizz floor screen is designed to reduce noise levels and visual stimulation in the workplace. Available in several formats to create a range of cubicle solutions, Offizz is suitable for a variety of office environments.

Zilenzio Studio

Zilenzio Studio has been developed to suit projects where the requirements for sound absorption are slightly lower. The screen is available with removable fabric, with several different options for feet and fittings. Zilenzio Studio meets the market requirements with a complete and updated reference and labeling system. The system is based on three requirement areas. Quality (technical requirements), environment and responsible supply chains regarding socially, environmentally, and ethical responsibility.

Optima Table

Desk Screen

Optima, a sustainable table screen made to encourage recycling. It is made of class A recycled PET plastic and has an interchangeable outer textile cover. The cover can easily be fitted on the screen and can be changed to another color or pattern. The screen is lightweight and therefore ergonomic to install and move around.

Available with: Straight and rounded corners
Available with: Removable fabric

Optima Table Duo

Desk Screen

Optima Table Duo, a sustainable table screen made to encourage recycling. It is made of class A recycled PET plastic and has an interchangeable outer textile cover. The material has Class A sound absorption qualities. Light weight which makes it ergonomic to install and move around. The screens can be adapted to the specific fittings you use for your desk.

Available with: Straight and rounded corners
Available with: Removable fabric

Optima Floor

Floor Screen

Optima is environmentally friendly in many ways. It is made of Class A recycled PET plastic and has an interchangeable outer textile cover. The cover can be changed to another color or pattern. The screen is lightweight and therefore ergonomic to install and move around.

Available with: Removable fabric
Feet options: Base, Beam, Base+Beam, Cube

Focus™

For both a growing community of digital nomads and those still inhabiting more traditional workspaces, finding a moment of personal privacy in an otherwise public place — whether an open-plan office, cafe, hotel lobby or school — is an essential means to aid concentration and support wellbeing. Enter the Focus Family of screens: for privacy, ease and endless flexibility.

Focus Desk Divider

Textile Desk Divider

The Focus® Desk Divider establishes a calming cocoon to limit distraction and promote concentration. An extension to the Focus® family, the design is effective yet inviting. The Divider can be used to create an individual work space at home, or a personal zone in an open plan office or public space. Choose between square or rounded corners.

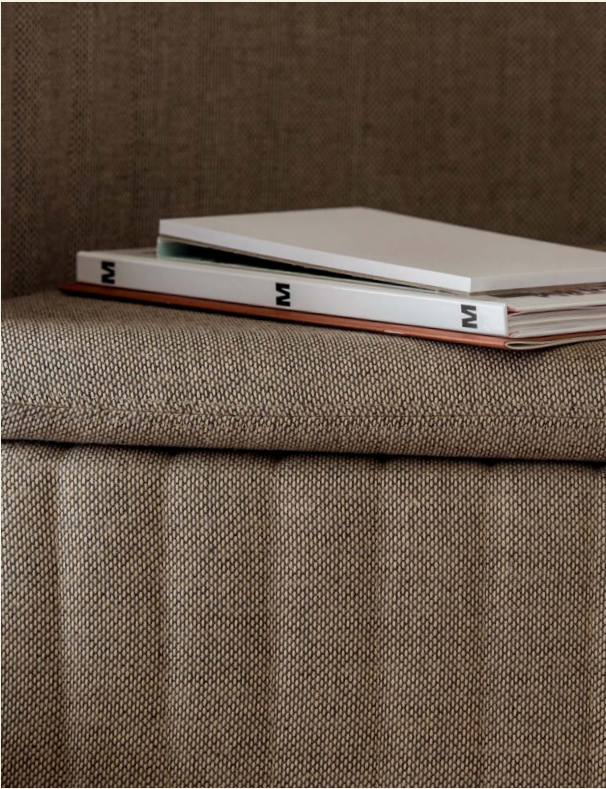

Focus
Pod Soft

Easy Chair

Focus® Pod Soft is a designed and comfortable seat that seamlessly infuses spaces with a touch of softness, creating an inviting and comfortable ambiance while limiting visual distractions.

Focus Pod

Easy Chair

Focus Pod is an adaptable and functional textile screen, complete with a comfortable seat and handy table. Offering a private nook in which to rest within an open-plan environment, it creates a calm and snug feeling for its occupant.

Available with pillow
Available with plug

Focus Floor

Textile Floor Divider

Focus Floor offers effective privacy in the form of a curved textile screen, combining a soft and tactile finish with excellent functionality. Its featherlight design and foldable construction ensure it's easy to move around and create new configurations in a flexible office environment. Choose the size and shape that best fits your needs.

A close-up photograph showing the upper portions of three upholstered chairs. The chairs are arranged in a row, with the olive green chair on the left, the dark navy chair in the middle, and the light beige chair on the right. The upholstery features a vertical ribbed design. The background is a neutral, light gray wall.

Focus Table is a textile space divider, offering a flexible solution for your needs for privacy, peace and concentration. When positioned on a tabletop, it creates a clearly defined personal zone in open-plan environments. It can easily be folded as a binder and stored after use, so it's perfect for activity-based offices.

Accessories

We have developed a range of beautiful and useful accessories to expand and enhance our Zilenzio Pro collection. Make a statement with elegant finishing touches and long-lasting functionality. Experience wellbeing at work, delivered through every detail. It's the Zilenzio way.

Tune Laptop Table

Table

A flexible table for the modern workplace. Tune Laptop table looks to float easily across the floor thanks to the asymmetrically placed post that makes it easy to get the table in over, for example, a sofa edge to create an ergonomic and comfortable workplace.

Tune Coffee Table

Table

Tune Table has been designed in an understated manner, this to create as little attention as possible, but instead tie together the collection. The tables serve as the “break” or “pause” between the sofa’s adding a lightweight and transparent look and feel to the collection. Using the same legs as on the sofas, the patterns remain the same and the wooden tabletop adds a crafted and soft expression. One could consider these tables as almost “non-design”, yet they become a highly versatile and functional product.

Kyoto Whiteboard

Hanging whiteboard

Our Kyoto series is now available with adaptable accessories — making the series more flexible than ever. Crafted from a frame in Ash, the Kyoto Whiteboard can be slotted into any professional space for greater functionality. Available in untreated ash, lacquered ash, whitewashed or blackwashed.

Kyoto Hanger

Coat hanger

Combining function and elegant design, the Kyoto hanger offers a flexible addition to the Kyoto series and any professional space. Available in untreated ash, lacquered ash, whitewashed or blackwashed.

Focus Pillow

Pillow

The Focus pillow is designed for additional sitting support. Combine it with the Focus Pod seat for the ultimate comfort.

Sustainability

We always strive to realize ambitious designs and champion smart processes — offering products that create a bold impression without leaving a heavy footprint on our planet, measured in our scope emissions.

As part of our ongoing commitment to sustainable practices, The Green Tag is our initiative to interrogate and transform our environmental credentials right across our product range. The Green Tag is a symbol of our ongoing commitment to sustainability and a daily reminder for us to question every design and production decision we make. It's our promise to tread lightly on the earth.

The Green Tag Manifesto

We're challenging the integrity and longevity of our brand from the inside out. And we're inviting our customers and partners to join us on this exciting and essential mission.

Designing and making beautiful products of the highest quality and longest lifespan is our forever mission. From the way we manufacture our products and the materials we use — to our packaging and recommended aftercare — we ensure that every step of the journey is carefully considered. With changeable parts and the ability to recycle our products when they do finally reach the end of their lives, an intelligent approach to repair and reuse is inherent to our brand.

Our sustainability goals to 2030:

- We aim to be climate neutral before 2030.
- Increase the filling rate of our transports by 20%.
- 20% of our floor and table screens will feature removable fabric by year 2025.
- 100% of our wooden components should have a certificate claiming it's been sourced by responsible forestry.
- We will have EPD's on 10 of our products by 2025.

THE GREEN TAG
ZiLenZiO

An outstanding lifespan

Our quality products are designed to last. We are proud to offer you an extended warranty of 20 years on all our products. It is our way to take responsibility and prevent overconsumption and excessive production.

The Zilenzio PRO collection is made mainly of stone wool and FSC-certified wood, both natural materials with good characteristics that can be reproduced into new products when recycled. Several of our products are available with replaceable fabric and we can help you reupholster the product, to extend the product's lifespan and offer a truly sustainable alternative.

Function

Phones ringing, loud conversations, a copier in high gear and the constant dings of incoming emails from colleagues' computers. Sound familiar? For many, it is an accurate description of their everyday work environment.

Many people are unaware that the noise level at their place of work is too high. Loud noise affects not only our ability to work, but also our health and quality of life, both during and outside of working hours. Undesirable and unnecessary sounds, what we call noise,

can lead to hearing impairment, fatigue and concentration difficulties. Noise can also trigger our stress hormones, increasing the risk of high blood pressure. For employers, poor acoustics in the workplace can mean long-term sick leave and staff shortages.

It has become increasingly common for workplaces to be characterized by open office landscapes. An open landscape is practical and social since it makes it easier to communicate with your employees, but there are more risks. People conversing together is one of the biggest sources of sound in our workplaces, and impossible for our ears to filter out.

When we are exposed to a conversation between two people nearby, we risk being as much as 66 percent less productive than with a lower sound level. It becomes more difficult to focus on our tasks, which leads to impaired work results.

Our Designers

Note

Note is a Stockholm-based design studio founded in 2008 working within the fields of architecture, interiors, products, graphic design and design strategy. They like to pay attention to their surroundings, and aim to create objects that make others do the same. By looking at what is unique in every project and emphasising that, they transform non-material values into tactile objects and spaces.
